

Subject: Request for Permission to Install an Electric Vehicle (EV) Charger

Dear _____

I hope this letter finds you well. I am writing to formally request permission to install an Electric Vehicle (EV) charger at the following location _____ associated with my rented property at _____.

As I have recently acquired an electric vehicle, this installation would greatly benefit my daily routine and contribute to the broader initiative to reduce carbon emissions in the UK.

There are several compelling reasons to consider my request:

Government Incentives: The UK government is actively promoting the shift to electric vehicles and is offering grants to support the installation of home charging points. The Office for Zero Emission Vehicles (OZEV) provides a grant known as the Electric Vehicle Homecharge Scheme (EVHS) that contributes up to 75% of the installation costs, capped at a certain amount (which varies and is subject to change). This scheme significantly reduces the financial burden of the installation. For more details, please refer to the official government site at <https://www.gov.uk/government/collections/government-grants-for-low-emission-vehicles>.

Property Value Enhancement: As the transition to electric vehicles gains momentum, properties equipped with EV charging points are becoming increasingly desirable. Installing a charger may enhance the future marketability of your property.

Safety: Using a dedicated EV charger is safer and more efficient than charging through regular electrical outlets. A professionally installed charger ensures the vehicle is charged using the optimal power output, reducing the risk of electrical issues.

Minimal Disruption: The installation process is usually straightforward and will be performed by certified professionals, ensuring minimal disruption to the property.

Regarding the funding of this installation:

I am willing to fully fund the installation, ensuring all costs associated with this process are covered by me

I would kindly request that you consider funding the installation, given the long-term benefits it offers to the property.

Should you grant permission, I assure you that:

- The installation will be undertaken by an OZEV-approved installer, ensuring the work meets the required standards.
- I will ensure that any costs not covered by the government grant are addressed, based on our agreement.
- I am willing to discuss sharing or transferring the ownership of the charging point if and when I vacate the property.
- I will ensure that the installation complies with all local regulations and necessary permissions.
- I understand that this is a significant request and appreciate your consideration. I am more than willing to discuss this matter further and provide any necessary information to make an informed decision.

Thank you for your attention to this matter, and I look forward to hearing from you soon.

Warm regards,
